INTRODUCTION

►An aerial view of most urban areas shows swathes of asphalt, black. Green roof have begun to appeal to homeowners, businesses and even cities as an attractive way to promote environmentalism while solving the problems of conventional roofs. Green roofs supplement traditional vegetation without disrupting urban infrastructure.

MAGAGNINI FIRM

►Is the most producer of green roof in Macerata

UNESCO PROJECT B.E. S.R. T.A.

Magnini firm

The company is located in the Recanati countryside.

It isn't big but there are some plants and flowers in the greenhouse.

He works in the firm with his brother and her mother, recently Alessandro won the Oscar Green for the *Green Cake*.

UNESCO PROJECT B.E. S.R. T.A.

Green Cake

Alessandro creates low or no maintenance, which will become centerpieces for restaurants or bars, where you can eat everything inside. They change their flavor according to the "dough" that is grown inside. They also turn into cakes, with different tastes. With the possibility of being paired with meat, fish or even cocktails in theme nights.

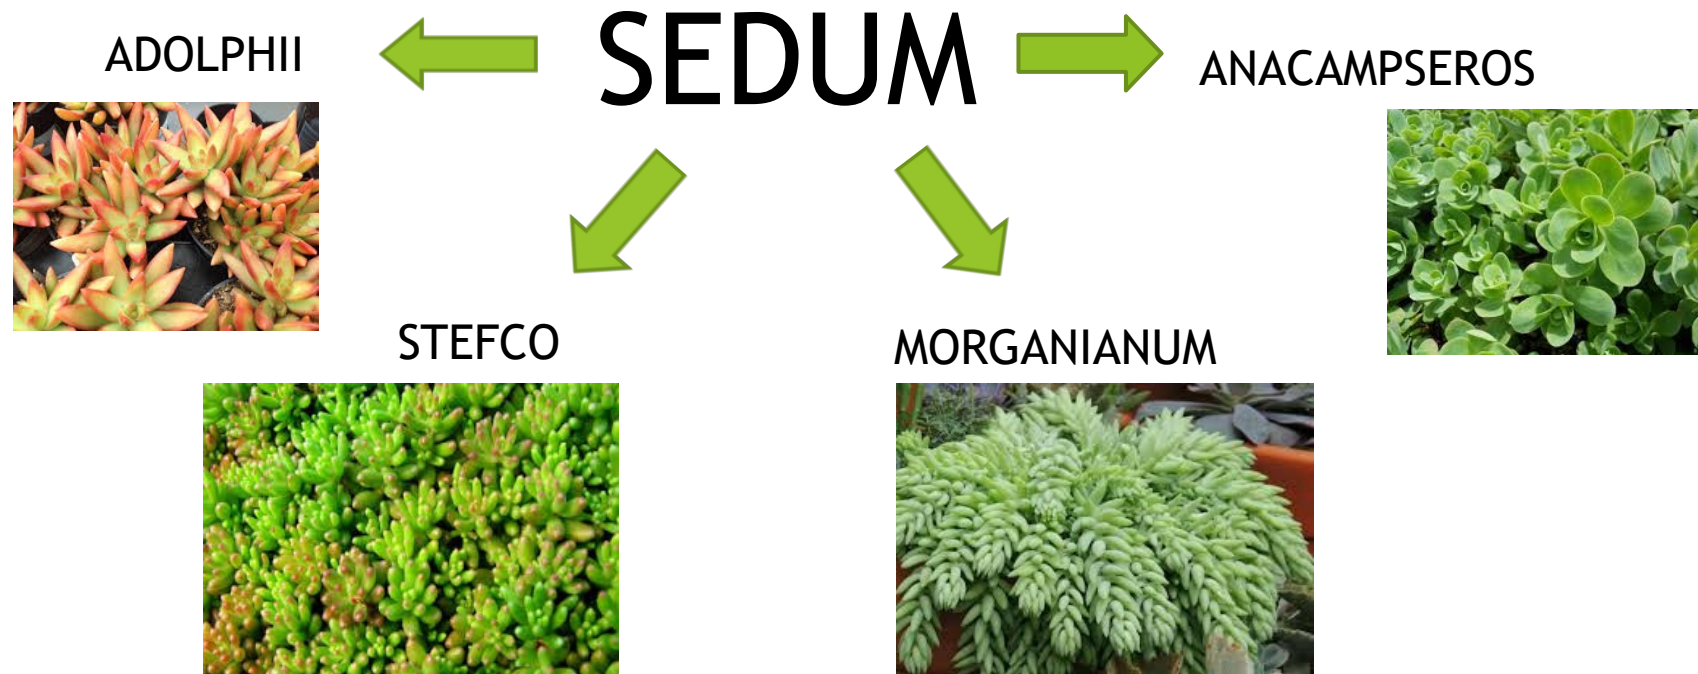

Which plant can be used for the green roof?

There is a wide range of plants to choose from for your green roof. The most commonly applied vegetation is the Sedum blanket. This vegetation blanket consists in different types of Sedum.

TYPES

Conclusion

The meior plant to build green roof in Agraria school is SEDUM.
The are different type of sedum plants to buid a green roof, the main variety is Adolphii because resist better to cold and hot temperature and it doesn't need maintenance.
The most sedum productor in Macerata is Alessandro Magagnini firm.
